

TABLE OF CONTENTS

CHAPTER 1:	ATOMIC CONCEPTS	1
	Definition of Chemistry	1
	Atoms.....	1
	Subatomic Particles.....	1
	Atomic Structure	1
	Models of Atomic Structure.....	4
	Orbital Model of the Atom	6
CHAPTER 2:	PERIODIC TABLE.....	14
	Development of the Periodic Table.....	14
	Properties of Elements in the Periodic Table.....	14
	Attraction for Electrons	14
	Atomic Radius	15
	Metals	15
	Nonmetals	16
	Metalloids (semi-metals).....	16
	Noble Gases	16
	Chemistry of a Group (Family).....	17
	Groups 1 and 2	18
	Group 16	19
	Group 17	19
	Group 18	20
	Groups 3-11	20
	Chemistry of a Period.....	23
CHAPTER 3:	MOLES / STOICHIOMETRY.....	29
	Chemical Formulas.....	29
	Symbols	29
	Formulas	29
	Naming and Writing Formulas of Chemical Compounds.....	30
	Mole Interpretation.....	32
	Use of the Mole Concept.....	32
	Gram Atomic Mass (gram-atom)	32
	Problems Involving Formulas.....	32
	Gram Molecular Mass	32
	Chemical Equations.....	39
	Stoichiometry.....	40
	Problems Involving Equations	40
	Types of Chemical Reactions	44
CHAPTER 4:	CHEMICAL BONDING.....	48
	The Nature of Chemical Bonding.....	48
	Chemical Energy	48
	Energy Changes in Bonding	48
	Bonding and Stability	48
	Electronegativity	49
	Bonds Between Atoms.....	49

	Ionic Bonds	49
	Covalent Bonds.....	50
	Symmetry and Polarity	51
	Directional Nature of Covalent Bonds	51
	Polyatomic Ions	52
	Alkynes	111
	Other Organic Compounds	117
	Alcohols.....	117
	Organic Acids.....	118
	Aldehydes.....	119
	Ketones.....	119
	Ethers.....	120
	Esters.....	120
	Halides.....	121
	Amines.....	122
	Amino Acids.....	122
	Amides.....	123
	Characteristics of Organic Compounds.....	123
	Organic Reactions.....	129
	Substitution	129
	Addition	129
	Fermentation.....	130
	Esterification	130
	Saponification	131
	Combustion	132
	Polymerization	132
CHAPTER 8:	OXIDATION-REDUCTION.....	140
	Redox	140
	Oxidation.....	140
	Reduction.....	140
	Oxidation Number (Oxidation State).....	140
	Rules for Assigning Oxidation Numbers.....	141
	Finding Oxidation Numbers	141
	Electrochemistry.....	146
	Half-reactions.....	146
	Half-cells.....	146
	Electrochemical Cells	146
	Voltaic Cells	146
	Electrodes.....	147
	Electrolytic Cells.....	149
	Spontaneous Reactions.....	150
	Balancing Redox Equations.....	156
CHAPTER 9:	ACIDS BASES AND SALTS.....	162
	Electrolytes.....	162
	Acids.....	162
	Bases.....	162

	Salts.....	163
	Neutralization.....	163
	Hydrogen ion donors and Acceptors.....	166
	pH.....	169
CHAPTER 10:	NUCLEAR CHEMISTRY.....	174
	Natural Radioactivity.....	174
	Types of Emissions	174
	Detection of Radioactivity	177
	Half-Life	177
	Artificial Radioactivity.....	179
	Artificial Transmutation	179
	Nuclear Energy.....	180
	Fission Reaction	180
	Radioactive Wastes	181
	Fusion Reaction	181
	Uses of Radioisotopes.....	182
APPENDIX A	Useful Mathematics in Chemistry.....	188
	Scientific Notation.....	188
	Significant Figures.....	188
	Calculations and Significant Figures	189
	Percent Error.....	190
	Graphing.....	191
	Questions.....	194
APPENDIX B	Notable Scientists and their Contributions in Chemistry.....	195
APPENDIX C	Questions for Physical Setting/ Chemistry	
	Reference Tables	198
REFERENCE TABLES for Physical Setting / Chemistry		213
GLOSSARY		225
INDEX		237
