

CONTENTS

CHAPTER 1: PROLOGUE

The Local Environment	1
Observation, Inference, Classification	
Properties of the Environment	3
Measurement, Percent Deviation From Accepted Value Density.....	6
Density of Matter, Density and Phases of Matter, Effect of Temperature and Pressure on the Density of Gases	
The Nature of Change.....	10
Characteristics of Change, Frames of Reference, Rate of Change, Cyclic Change, Predicting Change, Energy and Change	
Environmental Equilibrium	13
Equilibrium, Environmental Pollution	

CHAPTER 2: MEASURING EARTH

Models	24
Laboratory Models, Mental Models	
Size of Earth	25
Earth Dimensions, Earth's Structure	
Determining Positions on Earth.....	27
Coordinate Systems, Latitude, Measuring Latitude, Longitude, Measuring Longitude, Earth Rotation and Time	
Mapping Fields	32
Isolines, Gradient	
Using Topographic Maps.....	32
Contour Maps, Map Features	

CHAPTER 3: MINERALS AND ROCKS

Minerals	47
Mineral Characteristics, Distinguishing Characteristics of Minerals, The Formation of Minerals	
Rocks	54
Relation to Minerals, Types of Rocks	
Igneous Rocks.....	54
Formation of Igneous Rocks, Features of Igneous Rocks, Structure of Igneous Rocks	
Sedimentary Rocks	59
Compression and Cementation, Chemical Processes, Biological Processes, Features of Sedimentary Rocks, Inferred Characteristics of Rock Types	
Metamorphic Rocks.....	64
Formation of Metamorphic Rocks, Parent Material, Types of Metamorphism	
The Rock Cycle	67
Transition Zones, Rock Composition	
Mineral Conservation	70

CHAPTER 4: THE DYNAMIC CRUST

Earth's Crust and Interior	79
Earthquake and Volcanic Distribution, Solid and Liquid Zones, Interior Composition	
Earthquakes	83
Earthquake Waves, Seismograms, Locating the Epicenter of an Earthquake, Velocity of Earthquake Waves, Earthquake Strength, Earthquake Damage, Volcanic Damage	
Evidence for Crustal Movement.....	91
Major Crustal Changes, Zones of Crustal Activity, Theories of Crustal Change, Plate Movements, Fact or Theory?, Plate Boundaries, Geosynclines, Crustal Thickness, Crustal Composition, Magnetic Poles, Ocean-Floor Spreading, Ages of Igneous Rocks, Reversal of Magnetic Polarity, Minor Crustal Changes	

CHAPTER 5: SECTION 1 - SURFACE PROCESSES AND LANDSCAPES

WATER AND THE GROUND

The Water Cycle	124
Ground Water.....	125
Infiltration, Permeability, Porosity, Water Retained by Particles, Capillarity	
Surface Water.....	128
Runoff	
Weathering.....	130
Weathering Process, Weathering Types, Climate and Weathering, Weathering Rates	
Soils	133
Soil Formation, Soil Solution	
Erosion.....	137
Evidence of Erosion, Types of Sediment, Factors Affecting Transportation, Gravity, Running Water and Erosion, Wind and Ice Erosion, Effects of Erosional Agents, Effects of Humans on Erosion	
Deposition.....	143
Factors Affecting Deposition	
An Erosional-Depositional System	148
Energy Relationships in Erosional-Depositional Systems, Dominant Processes in an Erosional-Depositional System, Life History of a Stream, Erosional-Depositional Interfaces, Dynamic Equilibrium of a Stream, Erosional Depositional Changes	

CHAPTER 5: SECTION 2 - SURFACE PROCESSES AND LANDSCAPES

OCEANS - GLACIERS - ENVIRONMENTAL CHANGES

Ocean Currents and Wave Action.....	169
Introduction to Oceans.....	169
Ocean Floor Activity	
Ocean Currents	175
Erosion and Deposition By Wave Action	180
Waves, Beaches, Longshore Drift, Coast and Coastal Features	

Glacial Erosion and Deposition	189
What are Glaciers?.....	189
Glacial Erosion	192
Glacial Deposition	194
The Glacial History of New York State.....	199
Glaciers, Landscape, and the Economy of New York State	202
Wind Action.....	208
Erosional Features	208
Sand Dunes	209
Living in Balance With Our Natural Environment.....	504
Mass Movement	212
Landscape Development and Environmental Change.....	214
Landscape Characteristics	214
Landscape Observations and Measurements, Relationship of Characteristics	
Landscape Development.....	219
Uplifting and Leveling Forces, Climate, Bedrock, Time, Dynamic Equilibrium, Human Activities	
CHAPTER 6: EARTH'S HISTORY	
Geologic Events.....	250
Sequence of Geologic Events, Evidence of Events	
Correlation Techniques.....	257
Continuity of Rock and Correlation, Similarity of Rock and Correlation, Fossil Evidence and Correlation, Volcanic Time Markers and Correlation, Anomalies to Correlation	
Determining Geologic Ages	262
Fossil Evidence, Scale of Geologic Time, Erosional Record, Geologic History of an Area	
Radioactive Decay	266
Decay Rates, Half-life, Decay Products Ratios	
The History and Evolution of Earth's Atmosphere	271
The Fossil Record.....	272
Variety of Life Forms, Evolutionary Development	
CHAPTER 7: STUDY OF THE ATMOSPHERE.....	
Atmospheric Energy	291
Electromagnetic Energy	291
Properties of Electromagnetic Energy, Solar Energy, Matter and Electromagnetic Energy, Earth Energy	
Energy Transfer in the Atmosphere	296
Convection, Conduction, Radiation	

Energy Transformation	301
Conservation of Energy, Kinetic and Potential Energy, Friction and Energy Transformation, Wavelength Reradiation	
Heat and Temperature.....	302
Temperature, Temperature Scales, Heat, Calories, Specific Heat, Heat Gain or Loss	
Heat Energy and Phase Changes	305
Latent Heat, Latent Heat Loss or Gain During Phase Changes, Water and Latent Heat	
Atmospheric Relationships.....	310
Temperature Variations, Moisture Variations, Relative Humidity, Determining Dewpoint Temperature, Determining Dewpoint Temperature With Chart, Determining Relative Humidity With Chart, Pressure Variations, Moisture and Energy Input, Vapor Pressure, Factors Affecting the Rate of Evaporation, Saturation Vapor Pressure, Other Energy Inputs, Air Movement, Local Breezes, Planetary Convection Cells, Planetary Winds, Jet Streams, Atmospheric Transparency, Other Variables	
Clouds and Precipitation.....	329
Precipitation	
Moisture and Energy Transfer	334
Adiabatic Changes in Temperature	
Forecasting the Weather	340
Weather Maps and Forecasting.....	342
Station Model, Air-mass Characteristics, Source Regions, Air-mass Tracks, Cyclones and Anticyclones, Fronts, Mid-latitude Cyclones	
Hurricanes and Tornadoes	356
Hurricane Safety, Key Hurricane Alerts, Hurricane Safety Procedures, Tornado Safety	
CHAPTER 8: CLIMATES	
Water Cycle and Climate	379
Insolation and Earth's Surface.....	381
Insolation, Intensity of Insolation	
Factors Affecting Insolation	383
Angle of Insolation, Angle of Insolation and Temperature, Time of Day and Intensity of Insolation, Earth's Shape and Intensity of Insolation, Seasons and Intensity of Insolation, Latitude and Intensity of Insolation, Duration of Insolation, Duration of Insolation and Temperature, Temperature Changes and Radiative Balance, Maximum and Minimum Temperatures	
Radiation and the Atmosphere.....	397
Layers of the Atmosphere, The Atmosphere and Insolation, Land and Water Surfaces	
Terrestrial Radiation	399
The Greenhouse Effect, Radiative Balance Versus Time	
The Water Budget.....	403
Climate and the Water Budget, Stream Discharge and the Water Budget	

Factors Affecting Climate Patterns.....	406
Latitude and Climate, Elevation and Climate, Large Bodies of Water and Climate, Ocean Currents and Climate, Mountain Barriers and Climate, Wind Belts and Climate, Storm Tracks	
Seasonal Wind Patterns	408
Monsoons, El Niño and La Niña	
CHAPTER 9: EARTH IN SPACE AND BEYOND	
Astronomy	424
Earth in the Universe	424
Sunspots	
The Solar System.....	428
Formation of Solar System, Terrestrial and Jovian Planets	
Earth and the Nearby Planets.....	430
Temperature, Water, Atmosphere	
Modern Telescopes	431
The Future	
Space Objects	434
Asteroids, Comets, Meteoroids, Meteors, and Meteorites, Impact Events, Impact Craters	
Origin and Fate of the Universe	439
Doppler Effect	
Deep Space Phenomena.....	441
Comparing Temperature, Color and Luminosity	
Celestial Observations	445
Celestial Sphere, Star Paths	
Constellations	447
Star Shifts, Planetary Motions	
Models to Explain Celestial Motions	449
Geocentric Model, Heliocentric Model	
Orbital Forces	452
Modern Celestial Model, Orbital Geometry, Gravitation	
Earth's Rotation	459
Evidence of Earth's Rotation, Apparent Diameter, Motions of the Sun	
Time and Earth Motions	473
Apparent Solar Day, Mean Solar Day	
Moon and its Effects.....	475
Moon Motions, Tides, Phases of the Moon, Eclipses	

CHAPTER 10: ENVIRONMENTAL AWARENESS

Interdependence of Earth’s Living and Non-Living Systems	495
Pollution, Land Pollution	
Pollution of Earth’s Water	497
Sources of Water Pollutants, Types of Pollutants, Aerobic and Anaerobic Bacteria, Eutrophication, Concentration of Pollutants, Long-range Effects	
Air Pollution	499
Health Problems, Pollution on a Global Scale, Acid Rain, Ozone Depletion, Global Warming, Population Growth	
Living in Balance With Our Natural Environment.....	504
Technology, Conservation, The Future	
EARTH SCIENCE REFERENCE TABLES.....	513
GLOSSARY	529
INDEX.....	553
REGENTS EXAMINATIONS
